

CLARTAS — Technical Testing Guideline

Complete QA handbook for testing all website features (manual + automation)

Product: CLARTAS Commerce Content OS	Document version: 1.0
Date: 2026-07-11	App version: 0.1.0
Requirements: 30	Scenarios: 73
Test cases: 137	Automation baseline: 54/54 passed (FULL-TEST-RESULTS.md)

1. Purpose & scope

This guideline defines how to test every CLARTAS feature end-to-end: public marketing pages, authentication, app modules, AI APIs, billing, security, and mobile packaging. It consolidates feature requirements, scenarios, and 137 test cases from `scripts/qa-test-data.mjs` with automation commands from `docs/qa/AUTOMATION.md`.

Pass criteria for release: Smoke + Sanity 100% · Regression ≥ 95% · Unit/Integration 100% · Zero open P0 defects from the Excel manual set.

2. Test environments

Environment	Setup	Use for
Local demo	<code>NEXT_PUBLIC_DEMO_MODE=true</code> , <code>npm run dev</code> , <code>http://localhost:3000</code>	Smoke, Sanity, Regression, E2E, UAT without login
Local auth	Demo off + configured Supabase Auth	Real sign-up / sign-in / OAuth / password reset
CI (GitHub Actions)	Workflow QA · Playwright Chromium	Automated gate on push/PR
Paddle sandbox	Sandbox keys + webhook secret	Checkout & webhook signature tests

3. Automation suites (how to run)

Suite	Command	Goal	Est. duration
Smoke	<code>npm run test:smoke</code>	App boots, dashboard, core nav	1–2 min
Sanity	<code>npm run test:sanity</code>	Core modules after deploy	2–3 min
Regression	<code>npm run test:regression</code>	All main routes + theme	5–8 min
E2E flows	<code>npm run test:e2e:suite</code>	Multi-step journeys	3–5 min
UAT	<code>npm run test:uat</code>	Acceptance criteria	3–5 min
Unit	<code>npm run test:unit</code>	Credits, upload, Paddle, rate limit	~10 s
Full plan	<code>npm run test:plan</code>	Unit + E2E + HTML/JSON report	10–15 min

Prerequisites: Node.js 22+, `npx playwright install chromium` (once), demo mode for local E2E.

Reports: `playwright-report/index.html` · `docs/qa/reports/laporan-qa-YYYY-MM-DD.html` · refresh narrative via `docs/qa/FULL-TEST-RESULTS.md`.

4. Defect severity & status

Priority	Meaning	Action
P0	Blocker — auth, payment, data loss, security	Stop release until fixed
P1	Major — core workflow broken with workaround	Fix before production
P2	Minor — secondary module / UX	Schedule in next sprint
P3	Cosmetic / nice-to-have	Backlog

Manual case status values: **Belum** / **Jalankan** / **Lulus** / **Gagal** / **Blokir**.

5. Recommended execution order

1. Clear stale cache if needed (`.next`), start `npm run dev` , confirm `http://localhost:3000` returns 200.
2. Run `npm run test:smoke` then `test:sanity` .
3. Run `npm run test:unit` and `test:regression` .
4. Run `test:e2e:suite` and `test:uat` .
5. Execute remaining Excel P0/P1 cases manually (auth, Paddle, uploads, RLS, real AI).
6. Record results in Excel + attach Playwright/Vitest artifacts for failures.

6. Automation coverage snapshot (from FULL-TEST-RESULTS.md)

Layer	Tool	Count	Result
Unit & integration	Vitest	18	100% passed
Browser E2E	Playwright	36	100% passed
Total automated	—	54	100%
Manual catalog	This PDF	137	Execute gaps below

Still primarily manual: real login/OAuth, Paddle sandbox checkout, exact upload boundaries, all 33 editor tools with live AI, RLS with two users, Capacitor mobile builds.

7. Feature modules — full test catalog

Use each table as the technical checklist for that module. Steps and expected results are the official manual case set.

Autentikasi

1 requirement(s) · 10 scenario(s) · 16 test case(s)

Requirements

ID	Feature	Code reference
REQ-F01	Autentikasi (email, OAuth, reset password)	src/features/auth/

Test cases — execution guide

Case ID	Priority	Type	Title	Prerequisites	Steps	Expected result
TC-AUTH-001	P0	Positif	Pendaftaran akun baru dengan data valid	Email belum terdaftar; Supabase dikonfigurasi; mode demo OFF	1. Buka /sign-up 2. Isi form 3. Klik Daftar 4. Periksa redirect	Akun dibuat; redirect ke dashboard; profil, workspace default, subscription free, saldo 20 kredit
TC-AUTH-002	P1	Negatif	Pendaftaran dengan email sudah terdaftar	Email existing@test.com sudah ada	1. Buka sign-up 2. Isi email duplikat 3. Submit	Pesan error; akun duplikat tidak dibuat
TC-AUTH-003	P1	Boundary	Password kosong saat pendaftaran	Mode demo OFF	Submit form tanpa password	Validasi menolak; tidak ada akun dibuat
TC-AUTH-004	P0	Positif	Login email/password valid	Akun aktif ada	1. Buka /sign-in 2. Isi form 3. Masuk	Redirect /dashboard; cookie sesi Supabase ter-set
TC-AUTH-005	P0	Negatif	Login password salah	Akun ada	1. Buka sign-in 2. Submit	Pesan error; tidak ada sesi; tetap di sign-in
TC-AUTH-006	P2	Edge	Login dengan input SQL injection	Akun ada	Submit form login	Login gagal; tidak ada bypass autentikasi
TC-AUTH-007	P1	Positif	Login Google OAuth	OAuth Google dikonfigurasi di Supabase	1. Klik Sign in with Google 2. Selesaikan OAuth	Redirect dashboard; sesi aktif
TC-AUTH-008	P1	Positif	Permintaan reset password	Email terdaftar	1. Buka forgot-password 2. Submit email	Email reset terkirim; pesan konfirmasi UI
TC-AUTH-009	P2	Edge	Reset password email tidak terdaftar	Mode demo OFF	Submit forgot-password	Pesan generik; tidak bocorkan keberadaan akun
TC-AUTH-010	P1	Positif	Set password baru via tautan reset	Tautan reset valid	1. Buka tautan email 2. Isi password baru 3. Submit	Password diperbarui; login dengan password baru berhasil
TC-AUTH-011	P1	Negatif	Tautan reset expired/invalid	Tautan tidak valid	Buka tautan invalid	Error; password tidak berubah
TC-AUTH-012	P1	Positif	Sign out	User login	Menu pengguna → Keluar	Redirect /sign-in; sesi dihapus
TC-AUTH-013	P0	Negatif	Akses /dashboard tanpa login	Tidak ada sesi; demo OFF	Akses langsung URL /dashboard	Redirect ke /sign-in
TC-AUTH-014	P0	Negatif	Non-admin akses /admin	User tanpa is_admin	Akses /admin	Redirect ke /dashboard

Case ID	Priority	Type	Title	Prerequisites	Steps	Expected result
TC-AUTH-015	P1	Positif	Admin akses panel admin	User admin	Akses /admin	Halaman admin dimuat
TC-AUTH-016	P0	Positif	Bootstrap user baru otomatis	Signup sukses	Periksa DB setelah signup	Profil, workspace, membership owner, subscription free, 20 kredit dibuat

8. Cross-cutting checks

- **Responsive:** phone / tablet / laptop / desktop for marketing + app shell.
- **i18n:** switch en ↔ id ↔ zh ↔ es; verify URL prefix and UI strings.
- **Theme:** light mode readable; dark mode pure black background (#000).
- **Security:** unauthenticated API calls rejected; webhook signatures verified; RLS isolation.
- **Performance smoke:** dashboard and editor interactive within acceptable local latency.

9. Traceability & artifacts

- Manual cases: `docs/qa/CLARTAS-Kasus-Uji.xlsx`
- Automation map: `tests/helpers/traceability.ts`
- Regenerate Excel: `node scripts/generate-clartas-qa-excel.mjs`
- Failed runs: screenshots/videos under `test-results/`
